Introduction to Brocade Data Center Fabric Manager (DCFM 101)

BROCADE EDUCATION SOLUTIONS

DESCRIPTION:

This training course provides an introduction to Brocade Data Center Fabric Manager (DCFM), including key features and functions, licensing, migration considerations, fabric discovery, and the Element Managers.

This course is available on-line with a live instructor (virtual classroom), or as self-paced, web-based training.

PREREQUISITES:

- Basic understanding of SANs
- Experience with B-Series or M-Series switches
- Experience with SAN management concepts and methodology

AUDIENCE:

IT professionals who are interested in learning high-level information about the DCFM management application.

OBJECTIVES:

Upon successful completion of this course, students should be able to:

- Describe an overview of DCFM, including the differences between DCFM Professional and Enterprise editions.
- Identify the feature differences between DCFM, EFCM, and Fabric Manager.
- Perform Fabric discovery.
- Launch the Element Manager.
- Identify the differences between M-Series and B-Series Element Managers.

DELIVERY OPTIONS:

The DCFM 101 course is available in two versions:

- **DCFM 101-VCT**: 2 hours of virtual classroom training.
- **DCFM 101-WBT**: 1 hour of web-based training.

Brocade Education Solutions provides you with several options to attend this training:

- **Virtual classroom** courses, taught by an instructor in an on-line environment
- **Web-based** training courses that are self-paced and studied on-line
