Brocade Network Advisor Training

BROCADE UNIVERSITY

ENROLL NOW:

eLearning (BNA 200-WBT)

PREREQUISITES:

Before taking this course, attendees should have working knowledge of:

- *Introduction to DCFM (DCFM 101–WBT)* or prior experience with the DCFM software
- *Introduction to INM (INM 101–WBT)* or prior experience with the INM software

DESCRIPTION:

This self-paced, web-based course (eLearning) provides the technical and process information needed to manage, monitor and troubleshoot SANs and IP networks utilizing the Brocade Network Advisor management application. This course is designed primarily for individuals that have prior experience with either Brocade Data Center Fabric Manager (DCFM) or Brocade IronView Network Manager (INM).

AUDIENCE:

This course is targeted at individuals interested in learning the Brocade Network Advisor management application. This course is designed primarily for individuals that have prior experience with either DCFM or INM.

OBJECTIVES:

Upon successful completion of this course, the student should be able to:

- Provide an overview of Brocade Network Advisor features and capabilities.
- Install and configure Brocade Network Advisor.
- Perform SAN discovery using Brocade Network Advisor.
- Describe SAN features in Brocade Network Advisor, including firmware management and zoning.
- Describe IP features in Brocade Network Advisor, including VLAN management and configuration change management.
- Perform IP discovery using Brocade Network Advisor.
- Perform IP performance management with sFlow.
- Collect logs and support information from discovered SAN and IP devices using Brocade Network Advisor.
- Create SAN and IP reports using Brocade Network Advisor.
- Describe the processes used to gather support information and review Brocade Network Advisor troubleshooting features.

DELIVERY OPTIONS:

The BNA 200 course is available in one version:

- BNA 200-WBT: 8 hours of web-based training.
