BiG 100: Introduction to Brocade iSCSI Gateway

(BiG 100-WBT)

BROCADE UNIVERSITY

DESCRIPTION:

This class provides an introduction to the technical and process information needed to deploy, configure, and understand Storage Area Networks (SANs) that utilize the Brocade iSCSI Gateway.

This training includes narrated lectures, demonstrations, and a review to help students become proficient with the Brocade iSCSI Gateway. Demonstrations during this course apply the processes defined in lecture, using scenarios developed from real-world solutions.

OBJECTIVES:

Upon successful completion of this course the student should be able to:

- Identify key hardware and software components
- Understand requirements for basic deployment tasks
- Configure the Gateway, including initiator and target parameters
- Deploy a Gateway cluster for redundancy
- Configure identities and security parameters
- Update firmware
- Upload and download Gateway database and log files
- Perform basic functional statistics monitoring
- Collect information for problem escalation

HOW TO ENROLL:

Visit the course catalog page, and search for the following Course Title: ***BiG 100: Introduction to Brocade iSCSI Gateway***

DURATION:

3 Hours

FORMAT:

Self-paced, Web-based training

PREREQUISITES:

SAN deployment and maintenance
Ethernet deployment and maintenance

AUDIENCE:

This course is for administrators and technicians responsible for implementing iSCSI SAN solutions using the Brocade iSCSI Gateway.
