IronView Network Management 3.0 (ETH 503)

Instructor-Led Training (ILT)

BROCADE EDUCATION SOLUTIONS

DESCRIPTION:

This course is an in-depth study of network management using IronView Network Manager as it relates to Brocade Ethernet products. The course focuses mainly on the IronView product. It covers the theory of operations, configuration, troubleshooting and network analysis using Brocade Ethernet products. Topics include the installation and configuration of IronView, Brocade Ethernet devices, monitoring given networks, and troubleshooting network problems using IronView as an analysis tool.

DURATION:

3 days

FORMAT:

Instructor-led training with hands-on lab exercises

PREREQUISITES:

Working knowledge of:

- ETH 103 and ETH 202, or equivalent knowledge
- Previous exposure to general network management issues in a Brocade Ethernet environment
- Brocade Ethernet CLI

AUDIENCE:

- Customers or resellers who are experienced with Brocade Ethernet products
- Network technicians with installation, configuration, and troubleshooting experience with Brocade Ethernet products
- Network administrators responsible for implementing layer 4-7 solutions
- Network support staff who act as network device installers and first-line support for a local- to global-sized business environment

OBJECTIVES:

Upon successful completion of this course, the student should be able to:

- Discover Brocade Ethernet network devices.
- Retrieve and download device images.
- Create, download, and apply access control lists.
- Create VLANs.
- Use sFlow to monitor and retrieve accounting statistics from Brocade Ethernet devices.
- Monitor changes to Brocade Ethernet network devices.
- Store and retrieve network events.
- Setup Brocade Ethernet devices and ports for mass download of configurations.
- Restore configurations.
