Implementing Effortless Networks with the Brocade ICX Family

BROCADE UNIVERSITY

DESCRIPTION:

This course is a fast-paced overview of implementing Effortless Networks with the Brocade ICX family of switches. The session includes an overview of Brocade ICX switches, a comparison of Brocade and Cisco CLI, and a review of other management tools including Brocade Network Advisor. This is an advanced course that leverages your existing knowledge of Brocade and/or Cisco products.

This course is available in a live, on-line classroom (virtual classroom), or as self-paced, web-based training (eLearning).

eLearning (ICX 101-WBT)

PREREQUISITES:

Before taking this course, attendees should have:

- Current Brocade (BCNE, BCNP) and/or Cisco (CCNA, CCNP, and/or CCIE) certifications
- Field experience

AUDIENCE:

This course is designed for professionals with current Brocade and/or Cisco certification(s) and field experience with implementing Layer 2/3 networks that wish to learn about Effortless Networks and the Brocade ICX family of switches.

OBJECTIVES:

Upon successful completion of this course, the student should be able to:

- Describe the Effortless Networks concept.
- Identify the features and functions of the Brocade ICX family of switches.
- Discuss HyperEdge™ Technology and how it supports Effortless Networks.
- Compare Brocade ICX functionality to current market competitors.
- Compare key Brocade and Cisco command-line interface (CLI) similarities and differences.
- Describe ICX deployment and stack management capabilities.

DELIVERY OPTIONS:

The ICX 101 course is available in two versions:

- ICX 101-VCT: 1.5 hours of virtual classroom training.
- ICX 101-WBT: 1 hour of eLearning.
