

# Brocade Certifications

Don't Be Brilliant. Be Extraordinary!

## **New Security Measures for Pearson VUE Exams**

### **Photos and Electronic Signatures**

As part of our ongoing commitment to ensure the integrity and value of our certification program, Brocade is introducing some advanced security measures. We will be implementing several Pearson VUE security enhancements, including adding a digital photo to a candidate's score report and to the Pearson VUE authentication website. Brocade candidates will have their photo taken at Pearson VUE test centers where this is possible, and have it placed in the score report. Digital signatures will also be captured. If you have questions about these new security measures, please contact the Certification Department at [certification@brocade.com](mailto:certification@brocade.com).
