

Brocade Certified Architect for FICON (BCAF) Training (CAF 200-WBT)

Web-Based
Training (eStudy)

**BROCADE
EDUCATION
SOLUTIONS**

Brocade
Certified Architect
for FICON

DESCRIPTION:

This course provides the technical and process information needed to design, deploy, manage and troubleshoot Brocade products in a FICON Environment. After completing the course, you should understand IBM System z I/O concepts, and be able to demonstrate knowledge of Brocade FICON Director and switching SAN components.

This course is designed in part, to prepare students for the Brocade Certified Architect for FICON (BCAF) exam (143-120).

DURATION:

12 hours

FORMAT:

Self-paced, web-based training

PREREQUISITES:

Working knowledge of:

- Six months work experience associated with FICON
- Brocade B-Series and M-Series products
- *Introduction to Brocade Data Center Fabric Manager (DCFM 101)*
- *Introduction to FICON (FICON 101)*

AUDIENCE:

This course is designed for storage administrators, mainframe and SAN administrators, system administrators, Mainframe and SAN architects, and systems and sales engineers involved in the design, deployment, and management of Brocade products in a FICON environment.

OBJECTIVES:

Upon successful completion of this course, the student will be able to:

- Review the architecture that supports FICON including the System z host, I/O channel, and FICON.
- Describe and compare features and functions of the Brocade B-Series and M-Series hardware and software products.
- Identify which Brocade products can be useful in maintaining as well as migrating from M-Series to B-Series FICON products.
- Plan and design a FICON solution using Brocade hardware and software products.
- Implement a FICON solution using Brocade hardware and software products.
- Managing a FICON implementation based on Brocade hardware and software products with a range of management tools.
- Perform troubleshooting tasks on a FICON solution based on Brocade hardware and software products.
