

BROCADE NETBACKUP WORKSHOP

PROFESSIONAL SERVICES

A One-Day Workshop to Help Optimize NetBackup Environments

HIGHLIGHTS

- Identify potential recovery exposures with a minimal investment of time
- Discover performance characteristics and potential bottlenecks in VERITAS NetBackup environments
- Identify key decision criteria for possible upgrades or migrations
- Gather actionable data that can improve ROI
- Address issues such as tape-intensive NetBackup clients, cache sizing issues, administrative event optimization, reclamation issues, and tape library sizing

Brocade® has found that only a small percentage of organizations are getting the full benefits from their VERITAS NetBackup environments. Issues such as incomplete backups, missed backup windows, tape library space issues, and reclamation errors can impact even the most robust enterprise backup environments—and cause countless headaches for their administrators.

To address these issues, Brocade helps organizations identify potential problem areas and implement quick fixes for their NetBackup environments—significantly improving operations. The Brocade NetBackup Workshop provides a focused, one-day engagement for NetBackup infrastructures, including data collection, analysis, and recommendations.

A FAST WAY TO ADDRESS CRITICAL ISSUES

As part of the workshop, Brocade experts will identify issues in order to make the fastest, most significant impact on the overall health of the NetBackup environment.

The engagement includes:

- Analysis of one NetBackup server
- Interviews with key staff members
- Data collection and analysis leveraging a specialized software tool
- Consulting and knowledge transfer with an experienced consultant
- A one-hour management presentation and review

KEY BENEFITS OF THE WORKSHOP

Many organizations invest in robust, complex technology solutions but never realize the full financial benefits. Moreover, technology not deployed in its most optimal configuration can pose a business risk due to unplanned outages or extended recovery times. In a focused day of consulting, Brocade can provide the expertise to mitigate these potential risks and maximize ROI. In addition, the entire NetBackup staff benefits from expert knowledge transfer and best-practice recommendations.

BROCADE

FIELD-PROVEN EXPERIENCE

As the storage networking expert and a leader in NetBackup implementations and operations, Brocade has performed numerous NetBackup installations, assessments, optimizations, health checks, and monitoring engagements across IT platforms and environments. As a result, Brocade consultants have experienced NetBackup's power and can help optimize this unique platform.

Brocade has the professionals, knowledge, and service programs to help:

- Analyze key objectives and resources
- Bridge knowledge and resource gaps
- Streamline the IT decision-making process
- Accelerate the process for implementing strategies, systems, and procedures
- Free up IT resources for other strategic tasks
- Recommend the right solutions and best practices to help streamline operations

RELATED SERVICES

In addition to the Brocade NetBackup Workshop, Brocade offers the following related services:

- NetBackup monitoring services
- NetBackup remediation services
- NetBackup integration with SANs, including design, integration of equipment/software, and project management
- VERITAS Volume Manager installation
- VERITAS File System installation
- VERITAS Cluster Service installation
- Brocade Fibre Channel switch integration

MAXIMIZING INVESTMENTS

Brocade and its partners offer complete data center solutions to meet a wide range of technology and business requirements. These solutions include education and training, services, and support to help optimize data management investments.
